Ms. Melissa Whittington (3HW41)
Remedial Project Manager
U.S. EPA Region III
841 Chestnut Building
Philadelphia, PA 19107

2-10-94

Dear Ms. Whittington,

I am writing to, once again, tell you that I oppose your new remedy for the Love Landfill and that I continue to support the Engineering Science plan of cap and monitor. The EPA plan still adds unnecessary expense and still gives no guarantee that the problem will be solved. Even your own agency is backing away from the original Superfund laws because they are too costly and are not serving the purpose intended. The Love Landfill should never have been placed in this category to begin with. Please do not force a plan simply for the sake of doing something. The Engineering Science plan will provide for the safety of the community and preserve the public health at a much lower cost. This plan is supported by the county, so I see no reason to go against the county's wishes. Please go with the Engineering Science remedy.

Sincerely,

David Zimmerman
